Subject: RE: FMC RCRA groundwater monitoring
Date: Monday, November 11, 2013 3:44:53 PM

Kelly:

As you know, the 4Q13 RCRA groundwater monitoring began last week and continued today. Per the EPA approved RCRA Post-Closure Plan Sampling and Analysis Plans, which includes the FSP and QAPP for groundwater (Attachment 10 for each WMU subject to post-closure monitoring), the remaining RCRA wells/sample location that will be sampled Tuesday 11/12 and the morning of Wednesday 11/13 are: 165, 113, 115, 166, 167, 104, 168, 158, 183, 155, 156, 157, 121, 108, 122, 123 and Batiste Spring. Note that well 114 may be completed today or will be the first well on 11/12.

Again, similar to last week, please:

- (1) Confirm who will be observing the collection of samples;
- (2) Confirm that the Tribes staff will provide the sample containers and supplies (e.g., bottles, preservatives, labels, COC forms and coolers).

Kelly Wright and Susan Hansen, who have completed the FMC Visitor Safety Training within the past month, will need the RCRA Pond Area Work Rules training and should arrive at the FMC trailers at 6:45A on Tuesday, 11/12. If Tribal staff who have not completed the FMC Visitor Safety Training within the past month are to be observing the sampling, please confirm they will arrive at the FMC trailers at 6:30A on Tuesday, 11/12 to get that training plus the RCRA Pond Area Work Rules training. Hydrometrics will meet your representative at the FMC Trailers at 7A after the training has been completed.

As you have previously, Tribes personnel will be sign FMC's Visitor Acknowledgement form for each calendar day the Tribes are on the site. As you are aware, all personnel that enter work areas at the FMC site must wear a hard hat, safety-toe boots, safety glasses with lateral protection and work gloves.

Barbara, I was wondering the well numbers. If memory is correct they start with the up gradient then go down gradient.

I have not been able to find the signed version but have EPA's approval letter.

Was looking for FMC's approved QAPP but could not located a signed version. I would like to get a signed copy for our records.

Thanks and either Susan or myself will be out to provide bottles for the RCRA wells that are left.
Thanks
Kelly

> As you know, groundwater well sampling continued after Susan finished with the CERCLA wells last Wednesday. Sampling of the RCRA wells will resume on Monday 11/11, and is anticipated to be completed on Tuesday 11/12. Schedule will be similar to last week work on CERCLA wells, e.g., start 7A Mon and Tues. Again, similar to last week, please:
